ADA Warning Pavers™

EP Henry's ADA Warning Pavers™ are also known as detectable warning or truncated dome pavers, these pavers are specified by governmental agencies for use in pedestrian walkways. Sold by cube only, these pavers are not Durafaced.

Detectable warnings provide a distinctive surface of truncated domes detectable by cane or underfoot to alert people with vision impairments of the transition to vehicular ways These warnings compensate for the sloped surface of curb ramps which remove a tactile cue provided by curb faces.

Color Selections

Red

Please note, when compacting ADA pavers a protective rubber pad must be used on plate compactors.

"As specified by governmental agencies, when your projects demand the best, turn to EP Henry ADA Warning Pavers."
